Terotechnica
ASSET MANAGEMENT COLLEGE

We offer the following Specialization Diplomas :

- **Asset Management Leadership**
- **Maintenance Planning**
- **Asset Management Engineering**
- **Asset Management Practice**
- **Asset Management Excellence**
- **Asset Management Lead Practitioner**

We have Short Courses for those who want top information regarding a specific subject area but who do not need all the credits involved in the more rigorous examination involved in Comprehensive Study and these include:

S801: Reliability Centred Maintenance (RCM)

S802: Maintenance for Executives

S803: Root Cause Failure Analysis

S804: Decision Making in Maintenance

CHLORIDE

ZIMBABWE

Chloride Zimbabwe specializes in manufacturing and distribution of lead acid batteries under the brands Exide for the automotive market and distributed through Exide Express and Chloride for standby and motive Industry.

Chloride offers an after-sales service through its distribution network and technical team for industrial batteries.

CHLORIDE has a range of high energy battery cells designed to support applications that require a high level of power and reliability.

Training for battery handling, care and maintenance is also provided. We offer the following:

- **Diesel Locomotive Starting Batteries**
- **Forklift Batteries**
- **Exide Automotive Batteries**
- **Exide Solar Batteries**
- **Underground Locomotive Batteries**
- **Technical Support**

VTH HEAVY

HAULAGE (Pty) Ltd

Founded in 1974, VTH is a citizen owned company of Botswana. VTH strives to build and foster ongoing client relationship by providing reliable equipment across all VTH divisions to support the customer's specific project requirements. We operate Abnormal & Line Haul loads throughout Botswana and transport across Southern Africa and SADC countries

We have three divisions of focus:

Heavy Haulage Offering Specialized Logistic Services (Abnormal Loads)

Project planning & managing of projects

Line Haul

Tri-Axel & Super Link combinations

Service

Internal Equipment Maintenance & Servicing

GIANTS EA PROJECTS

We offer sustainable Engineering solutions that include:

- **General mining and industrial supplies**
- **Fabrication and steel works**
- **Lifting Equipment specialists i.e. All types of cranes ,loading testing, supplies and repairs of all lifting equipment.**
- **Plasma cutting as per drawings.**
- **Earthmoving equipment specialists Parts and component supplies.**
- **NDT and ultrasonic testing.**

The Probe Mining Group of companies has evolved to offer a comprehensive, strategic array of best-of-breed technologies, products, and solutions that significantly improve the design of digital mines and data analysis through end-to-end Digital Mine Operation Solutions. Our integrated offering incorporates Operation Level 9 collision avoidance systems, the design and manufacture of safety solutions, air quality and gas monitoring, renewable energy, industrial solutions, air power, and other specialised solutions. We further provide auto electrical field services, batteries, spares & parts for off-highway vehicles (OHV) spares related to Komatsu drive systems, OEM harness manufacturing and Electrical Vehicle conversions.

AUTOMOTIVE SOLUTIONS - We offer a complete range of multipurpose and deep cycle batteries for all commercial and industrial applications, including marine, camping, uninterrupted power supplies (UPS), back-up power, solar, and solutions for telecommunication stations and energy lighting. This series includes lead calcium "wet plate type", tubular, AGM, GEL and Lithium-ion Phosphate technologies that cater for various deep cycle applications.

INTEGRATED MINING TECHNOLOGY SOLUTIONS - We focus on providing integrated solutions and transformation processes in the mining sector. Our investment in new technologies delivers secure and out-of-the-box solutions, including uptime and remote monitoring, for a more efficient and accurate exploration of operations. We capitalise on the potential of technologies, including the Internet of Things (IoT), big data and cloud computing to transform operations, better positioning mines to be able to address resource challenges and environmental pressures moving forward. Our intelligent systems combine technology, people, and processes to enable feedback loops, defining an organisation's competitiveness and ability to change the industry landscape. We design and manufacture custom solutions with our customer to overcome all the mining, construction, agriculture, marine and industrial sectors challenges.

INDUSTRIAL TECHNOLOGIES SOLUTIONS - We specialise in pneumatic brakes and clutches, industrial gearboxes, electric motors, bearings, as well as other related power transmission products servicing the industrial, mining, and marine markets. Fawick South Africa has been in operation for more than 30 years and is constantly expanding their product range. Through providing quality air, power, safety and energy solutions to industrial clients – we combine optimal performance with huge energy saving benefits. Not only do we offer strong aftermarket service and support, always including expert service technicians and ensuring the availability of spares, but we are also able to conduct air audits and air compressor assessments to ensure that the best products are selected for specific applications.

RENEWABLE ENERGY SOLUTIONS - We offer a dynamic selection of carefully sourced energy-relevant products and solutions from top global brands, as well as our own ProbeEnergy product range. Our offer is aligned with our mission to make world-class energy solutions accessible in Southern Africa. There is a huge need in the market for high quality yet affordable energy solutions for solar applications, particularly lithium-ion phosphate batteries, capacitor batteries, chargers and conversions - which have historically been very expensive. We're focused on offering the range, expertise and advice that mining, industrial and domestic users need to revolutionise their energy sources. ProbeEnergy further offers power solutions for a wide range of applications, including solar and backup, UPS, industrial, marine, telecommunications, heavy and light duty automotive, including conversions from diesel to Electrical Vehicle & charging systems.

SUSTAINABILITY

The Probe Mining Group of Companies views environmental practices as a central component of all planning and development. As an evolved mining organisation focused on social, environmental and economic sustainability guidance, we are proud partners of the Mandela Mining Precinct on The Real-Time Information Management Systems (RTIMS) research programme, which aims to improve data sourcing, transmission, storage, dissemination, information management tools, practices, and procedures for mines.

EXCELLENCE THROUGH INTEGRATION

All Probe Mining Group products and solutions are proven class leaders within the mining, construction, agriculture, marine and industrial sectors industry. Combined with the Gold Standard of professional installation and rigorous maintenance, our offering ensures that uptime for our clients remains well within the desired targets. We partner with our customers to deliver products and solutions that will improve productivity and safety by meeting their specific requirements. Ultimately, this reduces the Total Cost of Ownership for our customers.

KAYTECH

ENGINEERED FABRICS

As a pioneer and market leader in geosynthetic solutions for over 50 years, Kaytech has established a reputation as a reliable supplier of geosynthetics for mining and civil engineering applications that include:

- Tailings Storage Facilities
- Pollution Control Dams
- Haul Roads
- Erosion Protection.
- Dams and Canal Linings
- Sports Fields
- Drainage and Filtration

Kaytech has the products and professional engineering support to meet the needs of your specific infrastructural project.

Product Description :

For over 60 years, VEGA has provided industry-leading products for the measurement of level, density, weight and pressure. As the inventor of the modern radiation-based measurement system and the first to introduce a two-wire loop powered radar, VEGA has a strong tradition of product development and improvement. VEGA recently added optional Bluetooth technology to PLICSCOM, a detachable display and adjustment module.

Prestolite / Leece-Neville Heavy Duty starters and alternators are manufactured to stringent ISO9001 specifications and are supplied to OEM manufactures and OE after market for most Heavy Duty manufactures of yellow metal equipment - CAT, Cummins, Terex, Liebherr, Perkins, MTU, Komatsu, Bell, Hitachi, John -Deere, Perkins, etc.

Shelhurst Components Pty (Ltd) is the master importer of **Prestolite / Leece-Neville** in Southern Africa and stock and sell a full range of heavy-duty starters and alternators that are drop-in replacement for most mining applications. Shelhurst Components specialise in assisting mining fleet operators with the correct power application for the toughest jobs. Starters up to 12kw/24Vlt and Alternators from 100Amp/12vlt to 600Amp/24Vlt - all genuine **Prestolite/Leece-Neville**.

Why upgrade to Prestolite / Leece- Neville?

Mining machinery operates under some of the harshest conditions on our planet. Excessive heat, humidity, dust, mud, vibration 24/7 demanding a much higher level of performance and reliability than normal commercial vehicles and machinery. To function under these tough and arduous conditions. Alternators and Starter Motors have to be designed and developed with absolute reliability in mind. Prestolite /Leece-Neville test each and every product supplied to OEMs and Mining Fleet operators on mines from Russia to Australia testing year in and year out to achieve utmost reliability and performance in conditions from -40 to +105C.

Prestolite/Leece-Neville - New range of gear reduction **7.5kw and 12Kw 24Vlt M105 and M128R** gear reduction Starter Motors outperform the competition in some cases by double the normal duty cycles. These high torque starters are now OEM fitment to many of the major OEM yellow metal engine manufactures operating in the mining environment.

Replacing - 39MT/42MT and 50MT starters.

Prestolite/Leece-Neville - **BLD/BLP** 24vlt brushless alternators are powerful and efficient at low rpms where extra charging is most needed. These alternators are the most compact and durable in their respective class. 140Amp/275Amp/600Amp 24Vlt offer reliability up to 105C temperature exceeding normal duty cycles currently experienced on mines in Australia and South America.

Replacing - 30Si/33Si/36Si and 55Si alternators.

Selhurst Components Pty Ltd also stock a range of Heavy-duty **Prestolite/Leece-Neville** Alternators and Starter motors for **Commercial Vehicle applications** – Mercedes/MAN/Scania Volvo, DAF, Iveco, ERF, Renault, VW, etc .

Reduce your expensive premature vehicle downtimes due to Starter and Alternator failure, fit **Prestolite/Leece Neville** Alternators and Starter Motors to your fleet and extend your machines Duty Cycles.

Contact us with the OEM or OE part no's and Machine applications of the Starters and Alternators you require so we may quote you or direct you to your closest dealer.

For any enquiry, please visit our web site at www.shelhurst.co.za or contact Ray on +27 11 7952130/ +27 826572022 or Jesse on +27 780057255 or send your queries to - info@shelhurst.co.za / sales@shelhurst.co.za

Layher®

More Possibilities. The Scaffolding System.

This brand promise made by Layher is the expression of a philosophy that we've been living by for over 75 years.

Layher, the world's largest producer of high-quality system scaffolding, was established as a family company in 1945 in Eibensbach, Germany.

Over the years, Layher has pioneered the development of advanced scaffolding systems and is consistently at the forefront of innovation, safety and quality.

South African subsidiary, Layher (Pty) Ltd, has been based in Johannesburg since 2011 and provides safety, simplicity and proximity in training and innovation. The company's versatility and high standards of engineering and service provision mean that profitability and safety are not contradictory.

Proudly recognised as the world's no. 1 system scaffold designers and manufacturers, Layher's exceptional quality in production, wide availability of stock, highly qualified and experienced technical support and on-site services are unmatched in the industry.

Layher's integrated system combines efficiency safety, strength, innovation, quality and service. We offer rapidly easy to assemble, lightweight, versatile, attractive and cost-effective environment protection systems and multiple solutions for workforce scaffolding access, public stairways and bespoke needs. When public safety and comfort come first, Layher's Allround Event Systems provide an inspired experience.

When you're working with Layher, you're working with the best!

Spilo StitchWise

BACKFILL BAGS

Spilo and Stitchwise produce specific geotextiles utilised in the world of deep-level mining.

Backfill Bags are manufactured from a uniquely woven geotextile. Every client has a different requirement and Spilo and Stitchwise's experienced teams are able to determine the most cost-effective geotextile to be used in conjunction with your slurry and support fill. Our geotextile backfill bags have varying percolation rates with various specifications.

Spilo and Stitchwise have been manufacturing backfill bags for more than two decades, and our focus on precision and consistent attention to detail allows for the ultimate support system. Our backfill bags are used in underground mines throughout Africa. We have successfully supported the hanging wall (roof) of the deepest mine in the world for many years.

AKS Lining Systems (Pty) Ltd

**18 London Circle, Brackengate Business Park
Brackenfell, Cape Town 7560 South Africa**

Tel: +27 21 983 27

Email: aksmarketing@aks.co.za

Web: www.aks.co.za

AKS specializes in the manufacturing of geomembrane and concrete protection liners. Geoliner is manufactured in 7m lengths and in thicknesses ranging from 1mm to 3mm. It is available with a smooth, textured or megatextured finish that can be applied in combinations of either single-or double-sided surfaces. It can be custom-made to suit your project requirements in HDPE or LLDPE according to International quality standards. Concrete protection liner, Anchor Knob Sheet, locks firmly into concrete structure using the successful cast-in method. Supplied in thickness from 1.65mm up to 10mm, it is used in a diverse range of Chemically aggressive applications.

Through consolidating the mining-oriented offerings within the Probe Group, the Probe Mining Group of Companies evolved to offer a comprehensive, strategic array of best-of-breed technologies, products and end-to-end Digital Mine Operation Solutions that can significantly improve the design of digital mines and data analysis. Our integrated offering incorporates Operation Level 9 collision avoidance systems, the design and manufacture of safety solutions, air quality and gas monitoring, renewable energy, industrial solutions, air power, and other specialized solutions. We further provide auto electrical field services, batteries, spares & parts for off-highway vehicles (OHV) spares related to Komatsu drive systems, OEM harness manufacturing and Electrical Vehicle conversions. With some of the most prestigious clients, the Probe Mining Group of Companies has over 50 years of experience in serving the South Africa and Sub-Saharan African mining industry. The Probe Mining Group of Companies Head Office is situated in Germiston, Johannesburg with operations in over 20 locations across South Africa and Sub-Saharan Africa.

26 Central Avenue, Eastleigh, Edenvale, Gauteng, South Africa, 1609.

We are a proudly African Bearing Company, specializing in mining and mineral processing. Our team now has over 30 years of industry experience. From consulting to international sourcing, we are confident in providing our customers with reliable service and good quality products, fit for our customers' needs. Our products include a wide range of Bearings, Seals, and power transmission equipment.

Bearings: Deep groove ball, Tapered roller, Cylindrical roller etc.

Seals: Double lip oil seals, High Temp/Viton, Torric, Seal kits etc.

Power Transmission: British/American STD chain Sprockets, Taper lock bushes etc.

Ad Hoc: Shaft fixings, Lock nut/Lock washer, Bearing heaters

The Probe Mining Group of companies has evolved to offer a comprehensive, strategic array of best-of-breed technologies, products, and solutions that significantly improve the design of digital mines and data analysis through end-to-end Digital Mine Operation Solutions. Our integrated offering incorporates Operation Level 9 collision avoidance systems, the design and manufacture of safety solutions, air quality and gas monitoring, renewable energy, industrial solutions, air power, and other specialised solutions. We further provide auto electrical field services, batteries, spares & parts for off-highway vehicles (OHV) spares related to Komatsu drive systems, OEM harness manufacturing and Electrical Vehicle conversions.

AUTOMOTIVE SOLUTIONS - We offer a complete range of multipurpose and deep cycle batteries for all commercial and industrial applications, including marine, camping, uninterrupted power supplies (UPS), back-up power, solar, and solutions for telecommunication stations and energy lighting. This series includes lead calcium “wet plate type”, tubular, AGM, GEL and Lithium-ion Phosphate technologies that cater for various deep cycle applications.

INTEGRATED MINING TECHNOLOGY SOLUTIONS - We focus on providing integrated solutions and transformation processes in the mining sector. Our investment in new technologies delivers secure and out-of-the-box solutions, including uptime and remote monitoring, for a more efficient and accurate exploration of operations. We capitalise on the potential of technologies, including the Internet of Things (IoT), big data and cloud computing to transform operations, better positioning mines to be able to address resource challenges and environmental pressures moving forward. Our intelligent systems combine technology, people, and processes to enable feedback loops, defining an organisation’s competitiveness and ability to change the industry landscape. We design and manufacture custom solutions with our customer to overcome all the mining, construction, agriculture, marine and industrial sectors challenges.

INDUSTRIAL TECHNOLOGIES SOLUTIONS - We specialise in pneumatic brakes and clutches, industrial gearboxes, electric motors, bearings, as well as other related power transmission products servicing the industrial, mining, and marine markets. Fawick South Africa has been in operation for more than 30 years and is constantly expanding their product range. Through providing quality air, power, safety and energy solutions to industrial clients – we combine optimal performance with huge energy saving benefits. Not only do we offer strong aftermarket service and support, always including expert service technicians and ensuring the availability of spares, but we are also able to conduct air audits and air compressor assessments to ensure that the best products are selected for specific applications.

RENEWABLE ENERGY SOLUTIONS - We offer a dynamic selection of carefully sourced energy-relevant products and solutions from top global brands, as well as our own ProbeEnergy product range. Our offer is aligned with our mission to make world-class energy solutions accessible in Southern Africa. There is a huge need in the market for high quality yet affordable energy solutions for solar applications, particularly lithium-ion phosphate batteries, capacitor batteries, chargers and conversions - which have historically been very expensive. We’re focused on offering the range, expertise and advice that mining, industrial and domestic users need to revolutionise their energy sources. ProbeEnergy further offers power solutions for a wide range of applications, including solar and backup, UPS, industrial, marine, telecommunications, heavy and light duty automotive, including conversions from diesel to Electrical Vehicle & charging systems.

SUSTAINABILITY

The Probe Mining Group of Companies views environmental practices as a central component of all planning and development. As an evolved mining organisation focused on social, environmental and economic sustainability guidance, we are proud partners of the Mandela Mining Precinct on The Real-Time Information Management Systems (RTIMS) research programme, which aims to improve data sourcing, transmission, storage, dissemination, information management tools, practices, and procedures for mines.

EXCELLENCE THROUGH INTEGRATION

All Probe Mining Group products and solutions are proven class leaders within the mining, construction, agriculture, marine and industrial sectors industry. Combined with the Gold Standard of professional installation and rigorous maintenance, our offering ensures that uptime for our clients remains well within the desired targets. We partner with our customers to deliver products and solutions that will improve productivity and safety by meeting their specific requirements. Ultimately, this reduces the Total Cost of Ownership for our customers.
